Austin Schweitzer - 402.641.8275
Jay Wolverton - 402.641.3745
Bob Wehrs - 402.641.1111 (On site at Bull Test)

Sale Details:

Sale will be March 30 in Milford NE at 3150 Old Cheney Road. Look for signs on the highway. Bull viewing at 10:30 AM, Lunch from 11:00 AM - 1:00 PM and Sale begins promptly at 1:00 PM. Please park in the field south of machine sheds weather permitting. Sale will be rain or shine.

Directions:

From I-80 and Seward Interchange go south to Hwy 6. Take a right-on Highway 6 and go 2 miles, then turn right (west) on old Cheney road. (Turn is after the curve that takes hwy 6 back south) Farm is 1.5 miles on the north side.

Auction Format:

Bulls will not be ran through a sale ring. They will be penned up close to the sale site for your close inspection on sale day. Videos of the Bulls will be broadcasted as they are sold. The Catalog is not the sale order. The sale order will be posted the day of the sale. Schweitzer Auction Service will be calling the Sale. For more information, visit:

www.nebauction.com.

Settlement and Delivery

All bulls must be paid for on sale day. You may take your bull home that day. Bull Delivery is free within 150 miles. The rest will be at Cost. To keep bulls at the Bull testing facility will be \$2.00 a day starting April 15th until delivered.

Health/ Guarantee

All bulls have received complete parasite control and modified live vaccine. All Bulls are 100% guaranteed for soundness and fertility for the breeding season. Each Bull has had a breeding soundness certificate from Dr. Jay Wolverton from the Seward Animal Hospital.

Appreciation Program

Anyone who purchases a Bull this year will receive a credit of \$200 that will be applied to any bulls purchased on the 2020 SRA Bull Sale.

Liability

All Persons attending this sale do so at their own risk. SRA and Wehrs Feed Yard assumes no liability for property loss or accidents that may occur.

EPDs

All EPDS are current on the pure-bred animals today from the Red Angus association.

Refer to page four to give you the details and meaning of each EPD. If you need any other additional information on a bull do not hesitate to ask.

This sale will be broadcast live on the internet.

Real time bidding & proxy bidding available.

**LOT 13
SRA REDEMPTION 893**

Welcome, THANK YOU! for your interest in the 2019 SRA Bull and Productions Sale. Our Passion for the Red Angus Breed continues to grow each year with results we are seeing in our program. Each Year the Bulls continue to get better as we fine tune our herd each year. Our improvement is based off the records we keep, and the culling decisions we make. At SRA we also work tightly with other top Red Angus Breeders to determine which AI sires we use each year that are changing the industry, and will take our herd to the next level. As you will see today on the offering over 80% of the Bulls are either Artificially inseminated or Embryo transfers. This brings you some of the best Genetics from across the United States. We continue to keep our best Bull each year and use them as our Clean up Bulls. This allows us to produce elite progeny so the natural calves can measure up to our AI and ET bulls.

This year we have 45 bulls offered up out of a combined 140 head Pure Bred operation combined between our Herds. Our Vision remains the same. Produce animals that will go out and add more pounds at weaning for area commercial cattle producers. More pound's equal more money and we all know every penny is important in the beef industry. At Schweitzer Red Angus we also strive to keep our EPD's very strong around keeping back replacement females so producers have that option is they so desire. Red replacement females are hotter than any breed in the industry right now and we take that in to perspective with our breeding programs. Lastly the only disposition we tolerate is good disposition because nobody has time to chase a high headed cow around the pasture, when we are trying to get to a Husker game day in the fall.

With the quality of the animals improving we now offer show animals in the fall with KAW Red Angus. While our number one focus is producing great Bulls, we had to find an avenue for the other 50% of the calves the heifers! We will be offering a number of registered heifers on the sale each year going forward which will coincide with a cooperator program if the buyer is interested.

We sincerely appreciate you interest in our program. We always stay humble with our operation and appreciate what we have. On the same note we want to stress that we have as much confidence in our bulls, versus some of the other breeders in the industry that have been doing this a lot longer than we have. We stand behind our Bulls and hope you will give us the chance to show you our bulls will improve your herd not just tell you.

Thank you for coming! We hope you enjoy our sale and find our Bulls and heifers valuable for your cattle operation.

*Sincerely,
Austin*

DETOUR

HerdBuilder

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GridMaster

Use the Gridmaster Index if your operation's primary goal is maximizing profitability of feeders in the feed yard and on the rail.

The Gridmaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

Thank You!

Thanks to Peyton Schluckebier for being our biggest help with Schweitzer Red Angus. He has put in a lot of time with the herd over the last four years and is pursuing his degree in Agricultural Business at UNL. Look for some of his Bulls on the sale in the future as we work to grow his personal herd.

RED ANGUS GUIDE TO EPDS

HerdBuilder (HB) - Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GridMaster Index (GM) - If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

Calving Ease Direct (CED) - Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

Birth Weight (BW) - Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

Weaning Weight (WW) and Yearling Weight (YW) - Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk - Predicts differences in weaning weight and daughters progeny due to milk production.

Maintenance Energy (ME) - Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

Heifer Pregnancy (HPG) - Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

Calving Ease Maternal (CEM) - Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

Stayability (STAY) - The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

Marbling Score (Marb) - Select bulls with high Marb EPD to increase the number of progeny that grade Choice or Prime.

Yield Grade (YG) - Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

Carcass Weight (CW) - Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

Rib Eye Area (REA) - Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

Backfat (Fat) - Need to reduce waste in carcasses? Select bulls with a low Fat EPD to reduce backfat, which favorably increases Yield Grade.

Top bidder gets choice or both of these great ET calves from GWR's leading donor cow ROBIN 307. She is a super outcross for Red Angus Genetics combining calving ease, performance and maternal traits with a very attractive phenotype. MC DETOUR was a great match for this flush. Galen is keeping ALL the heifer mates. These bulls are "Herd Changers". Recommended for heifers.

This is one of the three bulls out of our first herd bull we lost back in 2017. This bull was a Redemption son with all the features we were looking for. Very masculine bull that will provide a nice frame and pounds to your herd. This bull is top 25% in the breed in HerdBuilder and has a birth weight EPD of -2.4 making him great on heifers.

This is the second of three bulls from our deceased herd bull AJS RED ELITE 312. The Cow KAW 459 is a Roosevelt daughter of Bectoria 963 our current donor cow. This genetic line up has produced a lot of quality show animals. The mother to this bull produced the best bull on last years sale that was retained by SRA for a herd bull. Outstanding pedigree with excellent genetics to go along. Study your lesson on this guy.

This bull is the most docile of the bunch. He was shown at the Seward County fair by Ben Wanekta. His mother is Donor cow of ours that was purchased as an embryo package from CT red Angus in Montana. This DAM mother with CT-MISS PAN 0760. He is stout with moderate frame with a grid Master score of top 17% in the breed. Let this tame devil add pounds to your calves at weaning!

If you want to talk about Longevity in an Animal the Mother of this Bull just turned 14 in February. Jag Lana 516R had a great Run at the Iowa State fair back in 2007. You take the longevity of this Cow and breed her to Redemption you get a great bull that produce females that will last. The bull is also top 15% in the Red Angus Breed for Grid Master Percentage. Do not sleep on this bull. This cow was purchased from the Sloup Simmental program after they used her to produce some great half-blood semimet females. Suitable for Heifers

This bull's dam is GWR's favorite REDEMPTION daughter. Shown as a heifer she is a big stout frame filled with depth and bone. GWR 805 is one of the few bulls being offered sired by KAW RAGNAR 527 the Senior Division Champion and Champion Two Year old Bull at the 2017 Nebraska State Fair. This Bull will add pounds to your weaning weights and yearlings and is recommended for heifers.

Last opportunity to pick up a bull from our Long-Lost Redemption son Herd Bull. Another great example of growth and power by his physical appearance. This bull is suitable for heifers and will produce long lasting heifers. His mother is From Gill Red Angus is South Dakota and is a Rambo Daughter. She has already calved this year and has stout calf again already this year.

Up for choice are 3 bulls from one of the most consistent flushes we've had at Woerner Cattle Co. These chromed up Purebred baldy Simmentals will work on all sorts of cows, and you'll have a great chance of throwing those sought after baldies too. These guys should add pounds to your program and some great replacements as well. They are all out of W/C Bankroll, who needs no introduction in the Simmental Breed. He was the record high seller ever for the great Werning program out of South Dakota, selling for \$205,000 when the ganvel dropped. The dam has been one of our most consistent cows, who after she finished her show career by winning Champion Cow-Calf at the 2016 Nebraska State fair, has always produced our top sellers and females we've retained in the herd. Not only do these bulls have a great phenotype, their EPD profile fits what the number guys are looking for as well. F921 has been shown and already found the backdrop himself a few times. He's more moderate framed and all power, we've liked him since birth. He's the biggest footed, soundest of the 3. F922 has been the biggest framed of the 3, he has a lot to offer and is sure to be make consistent, profitable calves for his new owner. F437 is the youngest of the group, but don't hold his age against him. We think he could easily be the most complete bull of the group.

Information available on sale day.

The Last April Bull we put on the sale. This younger Bull stuck out in the Pasture all summer. Great movement through his front side and great disposition. This Bull is suitable for heifers.

Heifers

This Year SRA is offering 12 Registered Replacement Heifers. While we wish we could keep them all it just isn't possible. We have made four groups of heifers available take 1 or all 3 in the lot. These heifers are just as good as anything we kept back most are sold due to like genetics in the herd. A free straw of semen comes with each heifer from SRA of KAW RAGNAR 527. If the mating is successful the owner has the choice to place the animal on the 2021 Sale.

Ten Open Commercial Red Angus Heifers

53

Ten Red Angus Commercial Replacement heifers that came from the SRA commercial herd now owned by Bob Wehrs. We handpicked the best ten and offered them up for the sale this year.

54

20 Red Angus Heifer Pairs take 5 or more

55

15 Red Angus Heifer Pairs take 5 or more

56

10 Black Heifer Pairs take 5 or more

57

10 Red Heifer Pairs take 5 or more

We will have +- 50 commercial heifer pairs the day of the sale on site. Most of them being red but we will also have some black pairs. Heifers are consigned by Bob Wehrs and Blue Rive Cattle of Milford. All heifers are deep in Body and have very good body condition scores. Both of these operations have sold many heifers pairs in the past the animals will speak for themselves the day of the sale. All bred to Low Birthweight Beckton Red Angus Bulls and Schweitzer Red Angus Bulls.
