SCHWEITZER RED ANGUS

March **28**  
1:00 PM  
BEATRICE 77 LIVESTOCK

## Welcome

We are thrilled to present our offering on March 28th for the Schweitzer Red Angus Bull and Production Sale. This year the sale is located at Beatrice 77 Livestock in Beatrice, Nebraska. Believe it or not, this is already the 4th Annual SRA Sale. The sale has turned not only into a bull sale but also a Red Angus enthusiast sale. Currently we have over 300 head on the sale for 2020. Our goal is to provide a top notch lineup of cattle that producers are looking for year in and year out. 2019 was a year that all livestock producers will be telling their families about for a long time. Some had it worse than others, but by the grace of the good Lord in the end we all put on our warm clothes and are checking for new baby calves on the ground a year later in winter and Spring of 2020. That mentality is what I love about livestock producers in the midwest, we are in it through thick and thin.

This year we have over 50 Bulls on the auction block. We have been more aggressive than ever with our selection process. We are leaving 20 bulls at home that we may have put on the sale in years past. As we continue to improve our seedstock herd, our commitment is to make our offering better each year. Better quality, better performance, better EPD's, and better pedigrees bring better bulls each year on sale day.

With SRA and our herd partners you are seeing the top end of around 200 registered Red Angus cows when you come to the SRA sale. As we get deeper into our program I am starting to see some rapid changes in our sixth year of seedstock production. Starting out, you outsource registered cows that you don't exactly know the full history of what you are buying. Now we are at a point where we don't outsource any cows or heifers; we keep our top females each year. Now we know the history of their mother, and in some cases, we know the cow history two or three generations back. This allows us to only select the best females to add to our herd.

In the past we may have artificially inseminated acquired registered cows that were bull bred. Now we are artificially inseminating a cow with some of the best Red Angus genetics that were top AI calves when the cow herself was mated. Now that we have had time this process is taking our operation to another level. In 30 months, we can have an AI bull calf on the ground out a top AI sired heifer that we raised. This process is changing the game for us. We will continue to keep our top females and kick out our low performers each year to bring you the best quality.

The goal of our sale is to provide you a great set of bulls and replacement heifers. As you will see on this year's sale, we are continuing to try new things. We have some red composite bulls and a good line up of black bulls with Chris and Kenni Woerner's operation. We can't keep all of our heifers, so we are also making these girls available this year in groups of three. These registered females will add power, size, and profitability to your herd. Most of all we do it because we love it. For some reason all of the work, stress, and hardship of raising cattle is in your blood and ours. That is why we are here!

Thank you for coming to our sale it really means a lot to us. If there is anything we can do to try and help your operation please do not hesitate to ask.

*Sincerely,*  
*Austin*

# RED ANGUS GUIDE TO EPDS

**HerdBuilder (HB)** - Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

**GridMaster Index (GM)** - If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

Use the Gridmaster Index if your operation's primary goal is maximizing profitability of feeders in the feed yard and on the rail.

The Gridmaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

**Calving Ease Direct (CED)** - Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

**Birth Weight (BW)** - Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

**Weaning Weight (WW) and Yearling Weight (YW)** - Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

**Milk** - Predicts differences in weaning weight and daughters progeny due to milk production.

**Maintenance Energy (ME)** - Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

**Heifer Pregnancy (HPG)** - Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

**Calving Ease Maternal (CEM)** - Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

**Stayability (STAY)** - The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

**Marbling Score (Marb)** - Select bulls with high Marb EPD to increase the number of progeny that grade Choice or Prime.

**Yield Grade (YG)** - Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

**Carcass Weight (CW)** - Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**Rib Eye Area (REA)** - Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

**Backfat (Fat)** - Need to reduce waste in carcasses? Select bulls with a low Fat EPD to reduce backfat, which favorably increases Yield Grade.

13%	13%	64%	33%	24%	41%			

We decided to lead off with the best. Pictures are worth 1000 words for this bull. SRA REDEMPTION 9909 is one of the top bulls we have ever raised. We weaned him off at 150 days due to his mother having a bad leg on July 9th. He weighed in at 600 pounds 45 days before he would normally be weaned. He tipped that scale at 1410 pounds when he was less than one year old. As far as EPD's goes he is one of the most solid bulls we are offering being in the top 15% of the breed in HB and GM. He is also top 25% in WW and YW. SRA 9909 was also shown and took second place in the open show at the Nebraska State Fair. If you're serious about taking your herd to the next level this bull is your future herd sire that will not disappoint. 9909 is suitable for heifers. **Retaining 50% semen interest if collected.**

SRA 9459 is another Redemption son whose # 1 focus is adding more pounds to your calves at weaning. He himself weaned off at 715 pounds. 9459 is in the top five percent in ADG and Yearling WT and to no surprise he is top 15% of the breed in the Grid master Column. This will be the fourth bull his dam has produced, all selling at the top 10% of our sale each year. This bull also is in the 1400# club before he turned twelve months old. His mothers sire dates to Bieber Roosevelt the sire of our Donor Cow M26P Bectoria.

26%	11%	55%	54%	20%	65%			

SRA 9310 is a Redemption Son that many will pick as the # 1 bull in the sale today. His mother is currently our best cow sired by Andras New Direction. The look and movement of this bulls stands out as soon as you see him. Top 15% of the breed in GM, YW, ADG, and HPG. If you like the dark Cherry Red calves that this bull will produce, then this is the bull for you. His mother is a darker red New Direction daughter. He was the third heaviest bull in the test at 1350 as a yearling. 9310 is also suitable for your heifer projects. Retaining 50% semen Interest if collected.

SRA Complete Pack 93091 is one of two Brown Complete Sons we have on the sale. This brown Complete Sire is still one of my favorites in the breed. This bull is out of a first calf heifer and has shined from a very young age. His strong point is going to be in a heifer program with a BW EPD of -3.7 which puts him in the top 10% of the breed. His mother is a Redemption Daughter out of our donor cow which speaks for herself with the first five bulls listed before this one. Our program is now at a point where you not only get bull sired by some of the top bulls in the industry, but their mothers are also sired by top bulls in North America. Complete Pack 9309 is an example of where the quality of our bulls is heading in the future.

43%	67%	6%	2%	67%	17%			

SRA Complete Ease 9307 is the easiest calving bull we are offering on the sale today and is also out of a heifer. His Birth weight EPD of -5.1 is top 2% in the breed as well as a CED score in the top 10%. This bulls mother is a flush mate to the mother of Lot 6 and he is sired by Brown Complete as well. The only difference between this bull is that Complete Ease is a month older and has even better EPDs for breeding heifers. One of the top Pedigrees you can find on the sale coming out of a pure-bred Redemption heifer. Unfortunately, his mother is offered on the sale today bred for the fall. She came up open after weaning off this stud at 700 lbs Adjust WW. Her lot number is 59A.

SRA Profit Center 9716. As we select semen each winter we try and keep improving our program to keep pace with the industry. Profitbuilder from Genex got the vote on some of our heifers last year. This bull is a result. He was weaned early to show at the fair and has absolutely been a tank ever since. His neck was so muscular early on that we have had trouble catching him in the head gate. This bull is packed with power and his mother is one of our favorites. His top Features are his top 33% in the breed for BW and top 8% in the breed for gridmaster. Profit center will be a great option for heifers. Retaining 50% semen interest in this bull if collected. His mother sells today as Lot 59B

SRA OLY Jr is the son of the great Oly Oscar. One of our herd bulls was sired by Oly Oscar so we decided to give his semen a try and this clean bull is the result. The dam of this bull was a first calf heifer sired by Feddess Big Sky. A very powerful pedigree on both sides of the family. This bull has had a great docile disposition from day one and will be an asset to your herd.

Oly 606D caught our eye when he won the Kearney Classic in the Red Angus Division. He was the top seller of the sale at the Kearney Classic in 2018. He presence blew up my phone so much that day I dropped what I was doing and drove down to buy him. His Grand Dam is a great Cow from Hueftle Cattle Company. On this sale he has sired Lots 43 and 44. We have kept back enough of his heifers we are willing to let him go this year. At his age and size he can get the job done for a 30-40 Cow calf pair Pasture. This old boy is for cows only. He is halter broke and tame as a dog.

214	51	12	-1.2	61	26	78	599	1360
3%	5%	51%	54%	37%	21%			

Fully loaded 9111 is a bull with one of the top two EPD scores on the offering today. Another Red composite 50% Red Angus and 48% Simmental. His mother sire is a Messmer packer from Hall Pokorny Red Angus. This bull is top 5% in the Breed for HB and GM. Top 7% for STAY top 1% for REA and FAT. With all that he still has a negative BW EPD of -1.2 if you want to use him on heifers. If you need to add muscle to your herd and reduce waste in carcass you won't beat the EPDs on this bull. Perfect bull for someone who feeds calves all the way out.

Fully Loaded 956 is arguably the best Red composite bull on the sale. Another 50% Red Angus and 48% Simmental offering. His numbers are astounding if you are looking at improving performance in the feed lot with your calves. Get ready for this Top 1% in the breed for REA, FAT, and YG. Yes that's top 1% in all major categories relating to carcass performance. Not to mention he is top 10% in HB and Grid master. His mother is an outstanding Red Angus cows out of Red Crowfoot Moonshine. Let this bull go to work for you if you want the feed lot manger seeking out what you are doing with your program!

Ragnar 9134 is out of our herd Sire Ragnar 527. We love this herd bull sired by Pie Code Red. Cherry Red, deep and long bodied. This calf was born April 11 and I would usually hold for the May private Treaty sale, but he has just come too far already. This bull has great visual appeal and is sound throughout each step. He is top 20% in WW, YW and STAY. Keep these genetics on your cow herd and get ready for dark Cherry red calves that will perform.

SRA Black Authority 8654 is a black hided Red Angus bull. We know the value of black cattle in our state and want to cater to that audience as well. We used a top Genex Angus bull Authentic and bred him to one of our top Red Angus cows. His dam is sired by Andras new Direction and arguably our favorite sire for retaining heifers in the herd. The result is a fantastic black Bull. If you are putting him on Black cows you will have black calf 100% of the time. His EPD are off the chart top 20% in nearly every category. Top 1% in ADG, GM, CW, and REA. This bull is a fantastic option for heifers and the calves will pack on the pounds. Retaining 50% semen interest in the bull.

You can't say we don't offer up our best for this sale. This guy is probably one of the best we've raised, and can back that up by winning Reserve Supreme Overall bull as a calf this past year at the Nebraska State Fair FFA show against 2 year old bulls. He is a flat out well balanced bull phenotypically from his big feet that pound the ground, great rib depth, muscle shape, and skeletal design. His dam is one of our top foundation cows that has never missed. He also carries the EPD profile that is hard to find out of the Broker lineage. If you're looking for a herd bull with some style, this is the guy for you.

Another bull that we'd rather keep this year and run on our own heifers, but you can't keep them all. Great Simmental genetics in his tree: His sire is the calving ease stud that was the high seller at Werning's 2018 sale at \$142,500 (who is a son of the great 8453U). His granddam is a full sister to Panarama, the dam of the \$400k Profit bull. He has a lot of style, great spring of rib, big footed, clean front 1/3, and sound as a cat. Don't pass up on great Simmental genetics like this for your herd, he's going to make quality replacements and those easy coming, scale popping steers

Another purebred Simmental bull that should work great on heifers. He has been a favorite at our place since birth. He came small, and then just continued to grow and impress, especially for being out of a first calf heifer. A lot of this business is all about the cows, and his dam is backed by the infamous Cottontail family. Then on his sire's side, he is backed by the great Werning 8543U cow, who has generated well north of \$1 million in sales. Not only does he have the mass, bone, and structure you want in a bull, he has got great calving numbers as well. He would work excellent running on Angus influenced cattle.

Wehrs Feed yard is a sponsor of the 2020 SRA Sale. We are a 2,000 head capacity feed yard in Milford, Nebraska. We pride ourselves on a clean very tight ran operation. We invite any SRA customer to visit with us about backgrounding or finishing your cattle. We enjoy working with people who are in it day to day like us. We treat your cattle like our own. Examples would be bedding down the calves in a feed yard when winter gets tough and conditions are not ideal. We can put the weight on your calves fast and get them to the sale weight you desire with balanced rations from our nutritional team. We have fed and prepared the purebred cattle that are on the sale offering today over the last six months. Contact us today about feeding your calves!

**Bob Wehrs: 402-641-1111**  
**Austin Schweitzer: 402-641-8275**

## **YOU BUY OUR BULLS WE BUY YOUR RED ANGUS HEIFER CALVES**

Open commercial Red Angus heifers are in high demand. A lot of people in Nebraska out source these heifers from states like Montana, Wyoming and Colorado. While these calves are great I like to think we have the same quality in Nebraska just not in as large of groups. Our goal is to acquire heifers from our bull customers, so we know the pedigree and EPD's we are getting. We will background them and work to have them at 750-800 lbs each year at the SRA sale so they are ready to breed. We feel this cycle will work nicely for our customers to be able to sell heifers above market price in the fall, and in turn buy replacement heifers when needed in the spring. Contact us today on buying your commercial heifers!

**SRA**  
SCHWEITZER RED ANGUS

# Fall Registered Bred Cows

If a cow comes open we usually cull her in order to produce the best of the best. However, if it is a cow that has produced excellent offspring before she gets a second chance. The second chance is the offer of Fall cows below. After all, if a heifer calf weans off a 700 lb. bull calf that ends up in the top of the sale line up you can't be too quick to Cull her. . . . Can you?

SRA BC 8614 just got kicked out of the barn this morning with a nice looking Bull calf (2-20-20). The sire of the calf was bred to lot 48 in last year sale a Dr Phil Son. She is a brown complete heifer out of one of our reputation cows. The one thing about her and her mother is she is going to be a small cow. Her mom is on her third calf and weighs 1100 pounds soaking wet. However, I kept her heifer this year for our own herd that weaned off at the top half of the group. The milk on this family is visually apparent and also top 25% of the breed. This dark cherry red heifer pair is hard to let go but will look great in your pasture this summer

# Open Heifers

With our drive to produce great Red Angus bulls comes a lot of great heifers to make decisions on. The top five of our heifers go to KAW Red Angus for the show heifer sale in the fall. Follow us on Facebook for those sale details to stand out at your future cattle shows. The bottom heifers go to the commercial herd. The pure-bred heifers that are left is what we are offering today. These Purebred heifers are top shelf. Selling in groups of three take one or take them all for 3X the price.

62A Ragnar's Rose leads off this group. Fabulous dark Cherry Red heifer out of our herd bull. She will make a great cow. We were close to showing her but she was just a little young. 62B is another Deep Ridge Glory heifer. 62C is our of our Oly Oscar jr herd bull who won Kearney a few years back. Her mother came from Jim Goseys dispersal. Very solid group.

Merlins Ace 63A starts us off. I love this stout heifer out of the ever popular Genex Bull Merlin. Her mother came from Gill Red Angus and has been a rock star for us. She has a Bull calf on the ground now that looks to stand up to anything we have. Two more deep bodied Ridge Glory Heifers to finish off this nice pen of three that is sure to be an asset to any herd.

Anty Boy 9540 leads us off. A great cherry red heifer out of a C-Bar Anticipation Son. I love her movement and overall stature. Her mother was one of the top cows bought off the Klein Red Angus dispersal. The 901 and 912 Ridge Glory heifers are already showing signs of being deep bodied pure-Bred cows that can get the job done.

I was able to pull of getting three Ragnar 527 Daughters in one pen of three. 65A is SRA Jenny 9511 she is deep bodied and will be a great heifer. I have five daughters out of the original 351 chato cow I started with; theymake great cows. 65B Ragars Nelly is out of a Gill Red Angus cow and has looked fancy all year but we did not make it into the show ring with her. 65C Ragnar's Layla wraps up the group. She was our last calf born last year but has come along nicely. If you need to fill your herd with three cherry red heifers that will provide longevity this is your buy of the day.

67A is a great deep cherry red heifer out of our C-Bar Anticipation Son. Her mother is a heifer from Peiper Red Angus that has been one of our highest grossing revenue Cows. It will be hard to let this one go. 67B is another Rutt ridge Glory Heifer that shows a lot of potential. Finally we offer another Ragnar Female SRA 6124. Her DAM is sired by the Great ANDRAS NEW DIRECTION. Another great pen offered up.

This group of three is the most diverse in the genetic Line up. 68A SRA Dimond 9579 is out of on of our top producing cows. She will have a near perfect udder like her mother and give you the potential for great Progeny year in and year out. 68B is the last Ragnar Heifer and has a lot of potential. Her mother has been a top producing cow. 68C is out of our Oly Oscar herd sire and her Dam came from Gill Red Angus. Another solid group to build your herd on.

The last two heifer's offered are the remaining Ridge Glory sired heifers we have. We held a heifer out of this group three that we were originally going to offer. Another great set up registered heifers.

*lot* **70** **THREE SIMMENTAL REPLACEMENT HEIFERS**

Information available at sale time.

*lot* **71** **THREE BLACK REPLACEMENT HEIFERS**

Information available at sale time.

*lot* **72** **5 COMMERCIAL COW CALF PAIRS**

These pairs are from the SRA recip herd. They are only on the offering because they did not take eggs this year but have great calves at side that were bred to our herd bulls.

*lot* **73** **38 COMMERCIAL RED ANGUS OPEN HEIFERS**

All of these commercial heifers came from customers that use SRA bulls. This is a great set of commercial females that will make a great cow herd.

*lot* **74** **30 BRED RED ANGUS COWS**

Bob Wehrs has consigned his Spring commercial Cows to the sale this year. This is a complete herd dispersal as he is moving to a Fall herd "because he is getting old." These Red Angus cows mostly originated from the SRA herd when we went to a seedstock herd. There are a lot of different ages on these cows. We will Pregnancy check and have them grouped in ages at Sale time. They are due to start calving April 15th.
