SCHWEITZER RED ANGUS

*Improving Our Herd to Benefit Yours*

**MARCH 20**

BEATRICE, NEBRASKA | 1:00 PM  
BROADCAST ON DVAUCTION

**CONTACT US**

Austin Schweitzer 402-641-8275

**SALE DETAILS**

Sale will be March 20 at Beatrice 77 Livestock, 3320 N 6th St, Beatrice, NE.

Look for signs on the highway. Sale will be rain or shine.

Friday March 19th

5:00 to Dark Animal Viewing

Saturday, March 20

9:00 to 1:00 Animal Viewing

12:00 Lunch

1:00 Sale Time

**SALE SUPPORT**

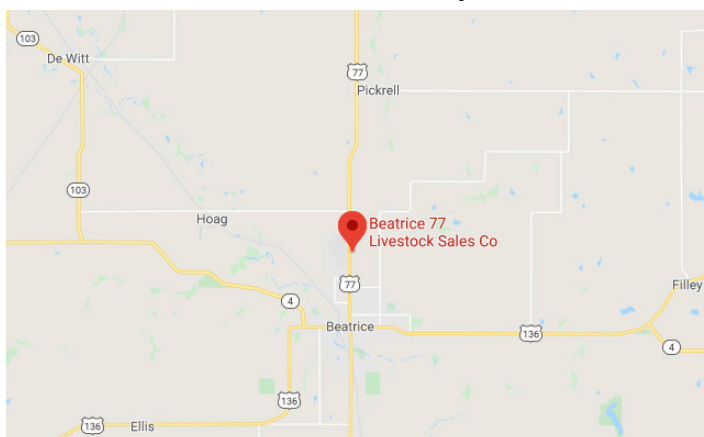

Tracy Harl, <i>Auctioneer</i> .....	402-469-3852
Chris Beutler, <i>Ring Man - Midwest Messenger</i> .....	402-380-0244
Randy Rasby, <i>Ring Man - Livestock Plus</i> .....	308-539-6195
Harold Bertz, <i>Red Angus Association</i> .....	816.661.2289

**SALE DAY PHONE NUMBERS**

Austin Schweitzer .....	402-641-8275
Jay Wolverton, <i>Veterinarian &amp; Consignor</i> .....	402-641-3745
Brett Stutzman, <i>Consignor</i> .....	402-641-1404
Jeff Aegerter, <i>Sale Consultant</i> .....	402-641-4696
Chris Woerner, <i>Simmental Bull Consignor</i> .....	402-641-8555
Galen Roebke, <i>Consignor</i> .....	402-641-7827

**DIRECTIONS**

The sale barn is located on HWY 77 on the north edge of town next to Walmart.

**ONLINE PARTNER**

Find ALL videos and pictures on DV Auction. Realtime bidding available online on day of sale.

**AUCTION FORMAT**

All animals will be running through the ring on sale day. Videos will be available on DV Auction for most of the animals represented. Make arrangement with us to look at the stock before the sale at any time. The sale order and supplement sheet will be available on sale day.

**This sale will be broadcast live on the internet.**

**DVAuction**  
*Broadcasting Real-Time Auctions*

**Real time bidding & proxy bidding available.**

**SETTLEMENT AND DELIVERY**

Bull delivery is available up to 150 miles. However, we will work with anyone on transportation. Sale day pick up is preferred. We will feed the bulls for you at the normal feed yard cost starting April 1. All females must go home on sale day unless other arrangements are made.

**HEALTH / GUARANTEE**

All bulls have received complete parasite control and modified live vaccine. All bulls are 100% guaranteed for soundness and fertility for the breeding season. Each bull has had a breeding soundness certificate from Dr. Jay Wolverton from the Seward Animal Hospital. As soon as the bulls are paid for the insurance will need to be on the new owners if anything were to happen to the bull after the sale.

**EPDS**

All EPDS are current on the purebred animals as of February 20, 2021 from the Red Angus association. Refer to page four to give you the details and meaning of each EPD. If you need any other additional information on a bull do not hesitate to ask.

**ULTRASOUND INFORMATION**

All bulls have been scanned and information will be available sale day.

## Welcome

It's hard to believe this is our fifth year with a Red Angus Seedstock Sale. We are very proud of what we are representing today vs when we started five years ago. We are more excited about what we will offer five years from now! We continue to make the sale a Red Angus event for the area. The Red Angus bulls are the center of the sale, followed by their registered sisters who stand very boldly beside them. Brett Stutzman again has a great reputation set of commercial pairs this year. We also continue to offer commercial replacement heifers, handpicked to help build anyone's herd. We will have some registered bred cows and pairs this year as well.

Economically speaking, I personally have very bullish looks for the cattle market in 2021. While the fat cattle market remains tight this winter, the future prices continue to trickle upward. I believe now is a great time to invest in your herd with bulls that make the difference, and that is what we are offering this year. There is no doubt in my mind that a good herd bull can change a cattle producer's bottom line in the first year. That being, I said I continue to see cattle producers go on the conservative end on buying bulls which has an influence on 50% of their calf crop. The only way to improve a business is to make a change in an area that can have an immediate impact. An exceptional herd bull that is 50% of outcome of your calves is a sure-fire way to change the game in your program.

We continue to focus on phenotype, fertility, and structural soundness with our program. Looking for moderate birth weight calves that turn in heavy weaning weights for our customers continues to be part of our vision. We continue to cull our cow herd very hard each year to be left with only the best animals to produce offspring for our annual sale.

Our number one goal is finding the path to develop 12-17-month-old bulls that will be a fit to go the distance to become long lasting bulls. It's no secret especially in the seedstock market some of the progeny gets special attention vs the average commercial calf. Being a part of a feed yard, I can tell you a feed truck can make any critter look better than they really are very fast. We work especially hard to seek out genetics where we can find traits that bring us hardy bulls that will go the distance. We purposely work to keep our bulls at 3.5 lbs. of gain per day during the bull test. While some may frown upon this, there is no doubt we can get a quality seed stock bull to gain 5+ lbs. a day. We work to let the bulls grow into their frame and to keep them very functionally sound to create longevity for the commercial cattle customer each year.

With our fifth year we have got into more detail; we scanned the bulls this year to produce all the traits necessary to help predict results on calves all the way up to slaughter. As the agriculture digital world continues to expand, it's only a matter of time until we are making a good part of our cattle decisions from the new technology that is provided to us. Scanning the bulls is just one more piece of information to help you make the right decision on your bull.

If you have taken the time to read the intro of our catalog "I usually don't" I encourage you to reach out to us. Schweitzer Red Angus is now a partner in Wehrs Feed Yard and we continue to look for ways to partner with our customers beyond the sale. Whether its backgrounding your calves or taking them all the way to market, we would like a chance to improve your bottom line. Once again thank for your interest in our stock this year! We feel your interest is in the right area to improve your operation!

As I type this, we have had 24 inches of snow in seven days and the forecast outlook is a high of 10 degrees for the next ten days! We have 50 calves on the ground, but the next 50 looks even more challenging. As you know, if you are reading this, you can take the boy from the farm, but you can't take the farm out of the boy. We all just keep rolling no matter what mother nature throws at us. We are extremely thankful for your interest in our lineup this year and appreciate your passion for the cattle industry. We wish you and your family prosperous health in 2021 for you and your cattle.

*Sincerely, Austin*

# RED ANGUS GUIDE TO EPDS

**HerdBuilder (HB)** - Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

**GridMaster Index (GM)** - If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

Use the Gridmaster Index if your operation's primary goal is maximizing profitability of feeders in the feed yard and on the rail.

The Gridmaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality- based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

**Calving Ease Direct (CED)** - Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

**Birth Weight (BW)** - Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

**Weaning Weight (WW) and Yearling Weight (YW)** - Predicts

differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

**Milk** - Predicts differences in weaning weight in daughters progeny due to milk production.

**Maintenance Energy (ME)** - Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

**Heifer Pregnancy (HPG)** - Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

**Calving Ease Maternal (CEM)** - Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

**Stayability (STAY)** - The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

**Marbling Score (Marb)** - Select bulls with high Marb EPD to increase the number of progeny that grade Choice or Prime.

**Yield Grade (YG)** - Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

**Carcass Weight (CW)** - Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**Rib Eye Area (REA)** - Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

**Backfat (Fat)** - Need to reduce waste in carcasses? Select bulls with a low Fat EPD to reduce backfat, which favorably increases Yield Grade.

# RED ANGUS RELEASES NEW INDEX TO IDENTIFY PROFITABILITY

*Posted November 4, 2020*

Denver – The Red Angus Association of America released an updated suite of bio-economic selection indexes, including the Profitability and Sustainability index, last week. The breed's new flagship index, abbreviated ProS, is an all-purpose index that covers economically relevant traits across all aspects of the beef supply chain from conception to carcass. This updated index will work as a combination of the already-existing HerdBuilder and GridMaster indexes, which include traits from conception to weaning, and postweaning through harvest, respectively. The ProS index is expressed in dollars per head born.

"Economic selection indexes are some of the best tools to help producers and commercial cattlemen and women with identifying animals that will improve the profitability of their operations. Using the updated ProS index will allow for improvement in the genetic potential of progeny to be profitable across all segments of the beef supply chain," said Ryan Boldt, RAAA director of breed improvement.

The ProS index will provide producers from all segments with information they need to make cattle management decisions in order to become more profitable and work towards greater beef industry sustainability.

"These new indexes are the best that have ever been available for describing Red Angus genetics," according to Tom Brink, RAAA CEO. "We're excited about how these new tools will enable our breeders to make rapid, multi-trait genetic advancement in the years ahead. They are easy to understand and use, and Red Angus breeders have already proven their commitment to commercial cattlemen through continually making the breed better in the traits that drive profit."

There are many economically relevant traits in beef cattle production. Since the ProS index encompasses conception to harvest, the traits included in the index are as follows: Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy, Stayability, Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Backfat and Rib Eye Area. Each trait in the calculation model is weighted based on the effect that trait has in terms of increasing profitability. Producers with questions about the new ProS index should contact Ryan Boldt, RAAA director of breed improvement, at [ryan@redangus.org](mailto:ryan@redangus.org).

To view current Red Angus EPD averages and percentiles visit [RedAngus.org](http://RedAngus.org).

SRA DEEP IMPACT was our featured show bull this year. His roots go back to Pieper Code Red, out of the ever profitable OLC Chato cow. He is undefeated in class and placed no lower than Reserve Division Champion in 2020 including the Nebraska and Kansas State Fairs. He is top 2 in the sale in REA. If you want a bull that provides depth to your calves and more money at sale time, SRA Deep Impact will be a great herd bull for you. Phenotypically outstanding and free moving animal, he hit 1400# as a yearling and now is close to 1600 pounds on a limited ration. This bull is likely the best bull we have ever raised. He is an SRA favorite and his cherry red color will be great to look at on the annual pasture tours this summer.

SRA HXC DECLARATION 028H has the best set of EPD's in the lineup! This bull is top 1% in the breed in YW, and ADG, not to be passed up by TOP 2% in the breed in WW and CW. To top it off, he is top 2% in the Profit Score and Grid Master. It is hard to find a bull with this type of report card in the Red Angus breed. Don't forget the scan where he is top 5 in REA on the sale and top 10 in Marbling. Top it off by his deep bodied visual appeal, and free moving strut this bull could be the sleeper of the sale.

Many people have told me that RRA Blockade H69 is the best bull on the sale. He is top 4% in the entire breed in Weaning Weight, Yearling Weight, REA, and Carcass Weight. Top 8% in the breed in ADG. If by now you haven't figured it out this is the bull, you want this guy to breed your cows if you are taking calves all the way to slaughter. He is an embryo calf and his mother was one of the top sellers in the Rich Red Angus Dispersal Sale. He is a beast and will be a great addition to any commercial or purebred herd.

RRA RED BOX H62 needs no introduction. Red Box is one of the most popular bulls in the Red Angus breed. This bull was an embryo calf and one of the top sellers on the Rich Red Angus Dispersal. On his dam's side he goes back to RRA RACHEL 819 which was one of the foundation cows for Rich Red Angus. Red Box continues to change the breed with his sons RED BLOOD and RED BEAR. Here is your opportunity to own a RED BOX son as your BULL! And to top it all off you could put him on heifers.

SRA MERLIN 0347 is one of the best heifer bulls on the sale. His CED and BW EPD are in the top 20% of the breed. BW is a -4.2! With that being said, don't expect his calves to hold back as he is top 20% for WW, YW, ADG. He is also in the top 10 of all the bulls in REA. These could be one of the best heifer bulls we have offered in a long time. Do not miss this bull.

GWR 8505 was Lot 1 on the SRA 2019 Sale. We brought this bull back from its current owner to give a glimpse of what we reach for as an end results of our bulls. He is back in the lineup this year and will be an outstanding herd bull for his new herd. Sired by Detour and out of the dam GWR ROBIN 307 a very solid donor.

**WE NEED YOU!**

SRA is looking for herd cooperators to put embryos into their commercial cow herd this spring!

>> Must calve between 1-1-2022 and 3-15-2022

>> All Expense for Embryo Transfer Protocol paid by SRA

Contact Austin for Details 402-641-8275

Lots 44, 45 and 46 are flushmates from KAW's most celebrated donor cow KAW MS FIREBALL 468. Fireball's daughters offered at auction have averaged \$6,000 including the top selling flush mate of these bulls at \$9,750 in the fall 2020 Maternal Magic Heifer Sale. Their sire is one of the top all-around sires in the Red Angus breed. The ABS bull Andras Fusion is wide-bodied, deep ribbed with outstanding foot quality and structural soundness. Above that he gifts unsurpassed docility. These three bulls are in the top 20% of Marbling, top 5% in Fat, and top 25% GridMaster with phenotype extending a long history of show ring success. They are a wonderful opportunity to build your herd from within. Truly maternal magic. Recommended for heifers and cows.

KAW TEDDY 001 started at the top of the crop at birth and finishes at the top of the KAW bullpen. His growth and performance on his strong, stout frame is hard to match. This is the "type and kind" we all want. Teddy's dam is a favorite daughter of Webr Dr Phil. He has the big foot and clean front of his sire the legendary Bieber Roosevelt. A real looker. Recommended for cows.

GWR FUSION 037 is another example of Andres Fusion making every cow just a little better. He is correct in his make, wide-based and wide topped. He stands correct on all four big feet. This bull's mother has become the matriarch donor cow and the GWR herd with generations of calving ease. She is a medium-sized cow built for long-term. Recommended for heifers, cows and an owner who wants to sleep through the night.

GWR FUSION 039 is the calving ease deluxe offering from GWR Red Angus. Turn him out with the heifers and let them calve on their own. Calving ease is deep on both sides of the pedigree but there is little compromise for growth and phenotype. His sire Andras Fusion needs no introduction to this sale. His dam goes back to cow 305, one of the best cows in the GWR donor chest. Recommended for heifers.

Here's a moderate framed herd bull prospect that will work in a lot of different operations. His sire, W/C Relentless, needs no introduction in the Simmental world and has produced many sale topping females and bulls. Great bull for making some big, cool sale topping steers with some style or to keep some cool replacements out of. He's got all the right pieces to make a great herd sire.

County 0 has been getting it done for us this last year! He produced our top selling females this past fall on our female sale, and this is the lone bull we had out of him this past year. Yes, he has a bit of color (he'll make some baldies on those all black hides), but if you look past that you'll see a good structured bull that will add some style and pounds to your next calf crop. Has good weaning and yearling EPD's, and his own growth numbers and weights have backed it up. Out of a second calf cow who in her first attempt raised a bull calf we liked so much we kept back to run on our own heifers. His calves look great so far this year.

Here's a moderate framed baldy bull that's been a favorite around here since he was born. He's out of a first calf heifer that as our selection out of the 2019 Trauernicht female sale, and she produced everything we hoped for in her first go. Well balanced EPD profile and plenty of style, this guy packs a lot into his moderate framed package. Should work on heifers, but also produce calves that will perform in the pasture and the feedlot. I think he'd work great on larger framed cows if your goal is to reduce frame size some and make muscular, deep sided steers and replacements.

Another PB Simmental bull that when it comes to phenotype, checks all the boxes. He's overall moderate with a super clean front 1/3 for a bull. Deep, soggy ribs, and great structure on top of it. He's about as pretty of a profiled bull as you can make one. He will make those attractive replacements and sons that will not only look great at sale time but will work on a lot of different cow types. He's been shown with success this past year, taking Reserve Simmental Bull at this past year's Nebraska State Fair FFA show.

*Consigned by Woerner Cattle*

About as good as a purebred Simmental beef bull as you can make one. Although his EPD profile might not blow you away, this guy will produce calves that smash the scales. He has always been the top grower on the place this past year, and in the top of all bulls on the sale every time he's been weighed. Powerful and muscular, with a big hoof and great structure that helps him flow around the pen, he checks all the boxes to go to work and cover cows in some of the most rugged conditions. His pedigree speaks for himself, as he was the product of a flush from one of the most successful cows in the breed, BF MISS Crysteel Tango, who sold for 114K just two years ago and has produced numerous champs and donors around the country. On the top side, he's out of TL Bottomline, 2016 American Royal and NAILE Champ that 1/3 semen interest sold for \$300K in the 2016 Hartman Bull Sale.

*Consigned by Woerner Cattle*

WEHRS FEED YARD

Wehrs Feed yard is a sponsor of the 2021 SRA Sale. We are a 2,000 head capacity feed yard in Milford, Nebraska. We pride ourself on a clean very tight ran operation. We invite any SRA customer to visit with us about backgrounding or finishing your cattle. We enjoy working with people who are in it day to day like us. We treat your cattle like our own. Examples would be bedding down the calves in a feed yard when winter gets tough and conditions are not ideal. We can put the weight on your calves fast and get them to the sale weight you desire with balanced rations from our nutritional team. We have fed and prepared the purebred cattle that are on the sale offering today over the last six months. Contact us today about feeding your calves!

# REPLACEMENT FEMALES

## 120 60 HEAD OF RED ANGUS REPLACEMENT HEIFERS

These Red Angus open heifers weighed 800# on February 28. They are from eastern Colorado and are ready to breed. Bangs vaccinated, poured and ready to go. One of the nicest groups we have seen. Take five or more!

## 121 40 HEAD OF RED ANGUS REPLACEMENT HEIFERS

Another great group of heifers. A little lighter group but bangs vaccinated and ready to breed! Take five or more.

## 122 80 HEAD OF RED ANGUS COMMERCIAL FIRST CALF HEIFER PAIRS

Two Iron Set out of Wyoming and Montana. Great deep-set of first calf heifers that will add volume to your herd. All the AI calves are sired by the ever-impressive Enterprise Red Angus bull from GENEX. Clean up bulls were sons of Redemption and a Crump Cinch Red Angus bull. These heifers are cake broke and will follow you anywhere.

*Consigned by S&S RED ANGUS*

## 123 30 HEAD OF RED BALDY FALL CALVING HEIFERS

F1 red baldy first calf heifers (sired by Oleen Brothers Hereford bulls, born September of 2019) bred to sons of Redemption for August 10 - September 25, 2021 born calves.

*Consigned by HUNT DC RANCH*
